

TP Global

GLOBAL SOURCING FOR THE BEST SPECIALTY WOOD PRODUCTS

TP Global leverages both our manufacturing and financial strength to offer beautiful, high-quality imported wood panels at competitive prices.

Our strong partnerships with a carefully selected network of manufacturers means you can trust that our products meet the strictest requirements. If a particular exotic species does not grow here, we can get it from overseas. We also bring offshore substrates to our plants and put domestic veneers on those substrates.

QUALITY IMPORTED PANELS

TP Global offers an extensive line with origins from all corners of the world. No matter where a product comes from, we strive to uphold ANSI standards for face grades and thicknesses measured to IWPA standards.

TRUSTED SOURCE

TP Global continues to be proactive in promoting sustainable forestry around the globe. In addition to being chain-of-custody certified to import FSC® products, we carefully choose foreign partners who share our same environmental values.

Our priority is transparency and compliance, making sure that all documentation is legal and precise, including CARB-TSCA compliance, Lacey Act and all other regulatory requirements. We are members of C-TPAT (Customs-Trade Partnership Against Terrorism) as well as a participant of the new CEE (Centers of Excellence & Expertise), both of which are through US Customs & Border Protection.

EXPERIENCED SALES TEAM

Our seasoned team members are more than import specialists. With an average of more than 20 years of experience in the wood products industry, our expertise is unmatched.
